GALERIE

PROFESSIONAL INKJET PHOTO RANGE

GALERIE Smooth Gloss and Pearl Paper features the very latest HDR (High Dynamic Range) optically clear nanoporous coating for outstanding imaging performance coupled with the benefit of 'touch dry' from the printer.

The high density heavyweight base has a natural photographic white tint to produce prints with an excellent colour gamut and high sharpness. The surface looks and feels like a true photographic print. It is compatible with all high quality dye and pigment based inkjet printers.

TIPS

- The glossy side (or the pearl side) of the paper is the printing surface.
- Follow the printer manufacturer's instructions for loading the paper.
- Store the paper in the original packaging to prevent damage to the printing surface.
- The paper can be handled immediately after printing; however, it should be fully dried prior to storing or stacking.

AVOID...

- ... touching the printing surface of the paper, this may affect image and colour quality.
- ... exposing the paper to extreme temperature and humidity as this can reduce image quality.

PRINTER SETTING GUIDELINES

This paper is designed for use in quality inkjet printers including Epson®, Hewlett Packard® and Canon®.

- Best results are achieved with printers designed for photo quality.
- Use 'Generic Printer' settings if your printer is not listed in the PRINTER SETTINGS GUIDE (see separate download).
- Personal preferences and individual printing conditions can vary. For best results, printer settings may need to be changed. Experiment with different settings to achieve the preferred look for your prints.
- For optimum printing results over 60% RH you may have to reduce printing speeds by using the highest resolution mode available.

TIPS ON PRINTER SOFTWARE

- Changing the media type (i.e. paper, film, etc.) under printer options alters the look of the print and can affect colour quality.
- Red, Green, Blue (RGB) files process differently than Cyan, Magenta, Yellow and Black (CMYK) files. Most images yield higher print quality when printed from RGB files.

PHYSICAL PROPERTIES (target values)

	GLOSS	PEARL
Weight:	290g/m ²	290g/m ²
Opacity:	99%	99%
Caliper:	290 micron	290 micron
Tint (Lab):	95.5, 0.7, -5.0	95.5, 0.7, -5.0
Gloss:	39% (20°)	25% (60°)
