

INTERfit

COR755/COR756 From May 2007

**Background support systems with improved low profile cross pole fitting.
(Silver fittings)**

Assemble the cross pole:

The cross pole is supplied in 3 easy to fit pieces. Either 2 or 3 sections can be used together dependent on the Background width. Each tube has a split section (Fig 1) which can be inserted in to the centre or the other end pole with the hole as shown in (Fig 2) When connecting just 2 cross poles for reduced width usage please ensure the you use the two cross poles with locating holes at each end.

Fig 1

Fixing the cross pole:

The cross pole when fully assembled sits on top of the Silver mount on top of each stand provided. (Fig 3) The Large hole must be face down to allow the stand to fit into the small locating holes of Fig 2.

Fig 2

COR755 Background Support System

**Small Max height 2.4m (94") Max Width 2.5m (98")
for use with Material back drops and small paper rolls.**

Fig 3

COR756 Background Support System

**Large Max height 2.6m (102") Max Width 3.15m (124")
for use with Material back drops and large paper rolls.**

**Muslin Backgrounds such as Interfit Masters series and Standard series
Are ideally suited to the Interfit Background support systems,
Paper Rolls may be used but may need some fixing clamps available from most
DIY stores to hold them firmly in place.**
